## OXIDIZED LDL

**98.03**

Normal Range: 11.6-90.5 U/L

**BORDERLINE HIGH**

### Oxidized Low-Density Lipoprotein (Ox LDL)

Over the past few decades, evidence has accumulated that establishes oxidized low-density lipoprotein as a useful marker for cardiovascular diseases (CVD), with several research groups demonstrating that the plasma Ox LDL level in patients with CVDs is significantly higher than the levels measured in healthy subjects.<sup>1</sup>

Oxidized LDL can either be measured by itself or with a comprehensive cardiac profile (Oxidized LDL with Lipids) that helps assess overall disease risk by including the assessment of lipids, and metabolic and cardiovascular markers related to nutritional and overall health.

1. Hiroyuki Itabe, Takashi Obama, and Rina Koto, "The Dynamics of Oxidized LDL during Atherogenesis," *Journal of Lipids*, vol. 2011

This test was developed and its performance characteristics determined by Precision Point Diagnostics or third-party reference affiliates. FDA clearance is not currently required for clinical use. Results are not intended to be used as the sole means for clinical diagnosis. Clinical correlation is required.
