

# SERVICES

- Precision Point Diagnostics bills insurance when requested for applicable tests/benefits on the patient's behalf with an acceptable insurance plan and a paid processing fee. Fees are due when the test is ordered.
- A \$49 Processing Fee is required per requisition form when submitting through commercial insurance. In the event insurance pays \$0 on the claim, or all billed applies only to the deductible, the patient is responsible for the Cash Price of each test, less the Processing Fee.
- Medicare patients are not subject to processing fees.

## FEATURED TESTS

	CLINICIAN TEST PRICE
<p><b>P88 Dietary Antigen Test (Serum)</b></p> <p>This is a highly detailed food response test that measures four independent immune reactions to 88 foods. It also analyzes food family reactivity, provides diets for the patients, and ranks each food from most reactive to least. IgE, IgG, IgG4, and Complement are all measured together to give clear immune reactivity guidelines, providing complete information for both allergies and sensitivities.</p>	<b>\$329</b>
<p><b>P88-Mobile (Serum, Mobile Phlebotomy)</b></p> <p>The same great P88 Dietary Antigen Test you know and love with mobile phlebotomy included in the price. We have partnered with GetLabs to provide mobile phlebotomy across most of the United States! Reach out to customer service or your rep for more information on this process! *(Additional test orders can be added to the P88-Mobile.)</p>	<b>\$359</b>
<p><b>P88-DIY (Micro-Sampling Device) - Available exclusively through  RUPA HEALTH</b></p> <p>The P88 Dietary Antigen Test can now be done at home! We are excited to announce the launch of our brand new micro-sampling device (nothing like a blood spot) that enables the patient to collect 120 microliters of blood at home or on the go!</p>	<b>\$359</b>
<p><b>Advanced Intestinal Barrier Assessment (Plasma)</b></p> <p>This measures Zonulin, DAO, Histamine, LPS IgM, LPS IgG, LPS IgA. These markers give information on the three primary ways the gut becomes more permeable, allowing for diagnosis of leaky gut and tracking improvement.</p>	<b>\$329</b>
<p><b>Advanced Oxidative Stress Test (Whole Blood, Urine)</b></p> <p>This test measures both fractions of glutathione, % reduced and total. This allows you to know if the most important antioxidant is usable or not. Markers of DNA damage and lipid damage are also measured with 8-OHdG and F2-Isoprostane.</p>	<b>\$275</b>
<p><b>Advanced Adrenal Stress Test (Saliva)</b></p> <p>This profile includes 4 point cortisol, slgA, &amp; DHEA.</p>	<b>\$133</b>

## AMINO ACID PROFILE

CLINICIAN  
TEST PRICE

### **Amino Acid Profile (Urine)**

The Amino Acid Profile helps with determination of amino acid imbalances, evaluation a functional vitamin and mineral deficiencies, and diagnosis of metabolic disorders.

**\$385**

## ALLERGY

### **Precision Airborne Allergy (Serum)**

This measures 85 environmental allergens through serum IgE response.

**\$219**

## CARDIO

### **Oxidized LDL (Serum)**

Oxidized LDL is the lipid most associated with cardiovascular disease. This oxidative event initiates plaque formation.

**\$77**

### **Oxidized LDL with Lipids (Serum)**

This test measures Oxidized LDL with Total Cholesterol, LDL, HDL and Triglycerides for a cost effective and predictive approach.

**\$121**

## ENDOCRINE

### **Complete Thyroid Panel (Serum)**

This profile includes TSH, Free and Total T3, Free and Total T4, Reverse T3, Anti-Thyroglobulin Ab, Thyroid Peroxidase Ab.

**\$99**

### **Female Hormone Panel (Serum)**

This profile includes DHEA-S, FSH, LH, Progesterone, Prolactin, Sensitive Estradiol, Estriol, SHBG and Testosterone.

**\$121**

### **Male Hormone Panel (Serum)**

This profile includes testosterone total, free PSA, estrogen, total dihydrotestosterone (DHT), sex hormone binding globulin.

**\$305**

## GASTROINTESTINAL

CLINICIAN  
TEST PRICE

### G-DAP - Gut Detox Assessment Profile (Whole Blood, Urine)

This profile is designed for the functional medicine practitioner as a way to help screen for the most common processes that are often at the root cause of disease. It looks at Zonulin, DAO, Histamine, LPS IgG, IgA and IgM, 8-OHdG, % Reduced Glutathione, Total Glutathione, F2 Isoprostane, Oxidized LDL, HgA1c, hsCRO, & Vitamin D.

**\$545**

### Comprehensive Stool Analysis with Parasitology (Stool)

The Comprehensive Stool Analysis and Parasitology panel aids in identifying causes of GI symptoms and imbalances that can result in systemic issues. It evaluates levels of healthy flora, dysbiotic flora, enzyme levels, protective nutrients of the gut, immune function, and digestion.

**\$303**

### Helicobacter Pylori Stool Antigen (Add on to Comp. Stool)

**\$133**

### Precision GI360™ (Stool)

The GI360™ Profile is an innovative, comprehensive and clinically-applicable stool profile, utilizing multiplex PCR molecular technology coupled with growth-based culture and ID by MALDI-TOF, sensitive biochemical assays and microscopy to detect and assess the status of pathogens, viruses, parasites and bacteria that may be contributing to acute or chronic gastrointestinal symptoms and disease.

**\$419**

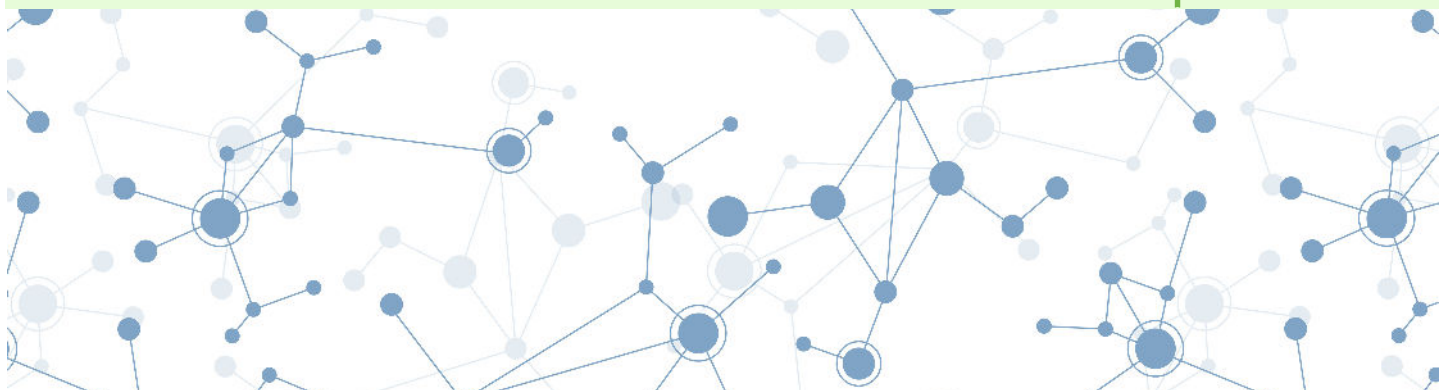

## NUTRIENT & TOXIC LOAD

### Comprehensive Heavy Metal Urinalysis (Urine)

The Heavy Metal Urinalysis is an analysis of 20+ heavy metal toxicants such as mercury, lead, and cadmium to help assess total body burden and toxic overload.

**\$133**

## **MEDICAL WELLNESS**

### **Female Wellness Panel (Serum, Plasma, Urine)**

This test is a global assessment including Chemistry Screen, CBC, Glutathione (Total and % Reduced) 8-OHdG, F2-Isoprostane, Complete female hormone profile, Complete thyroid profile with antibodies, Complete Cardio Profile assessment with oxidized LDL, as well as many other markers to do a global check in a cost effective manner.

**\$550**

### **Male Wellness Panel (Serum, Plasma, Urine)**

This test is a global assessment including Chemistry Screen, CBC, Glutathione (Total and % Reduced) 8-OHdG, F2-Isoprostane, Complete male hormone profile, Complete thyroid profile with antibodies, Complete Cardio Profile assessment with oxidized LDL, as well as many other markers to do a global check in a cost effective manner.

**\$660**

### **Comprehensive Screen (Serum, Plasma)**

This includes a CBC, Chem Screen, Complete Thyroid Profile, Vitamin D, IGF-1, and RBC Magnesium.

**\$165**
